A National Level Quiz on Digital System Design

Covid-19 pandemic has lead to lockdown so as to keep ourselves safe by staying at home. But learning and gaining knowledge has no boundaries. Lockdown should not stop anyone from learning. In view of this Department of Electronics Engineering, FAMT conducted a National level On-line Quiz on "Digital System Design" during 3rd July, 2020 to 13th July, 2020.

The objective of the quiz was to refresh the knowledge on Digital System Design. The quiz comprised of 15 multiple choice questions. It could be attempted by any Engineering personal since the registration and certification was free of cost. Those who secured more than 50% score in the quiz received an E-certificate. A total of 64 participants attempted the quiz. The participants were from Industry, teachers and students from various colleges as well as our alumni. We received response from Maharashtra as well as from other states too.

Prof. Vrishali V Nimbalkar coordinated the above activity under the guidance and motivation of Prof. Girish G Bhide (HoD, Electronics Engineering Department).
