A Bridge Course on Blockchain Technology in Network Security

The Information Technology Department organized a bridge course on Blockchain Technology in Network Security for TE IT students on 21-08-2021. The course was conducted from 12:00 pm to 03:00 pm via Google Meet. Prof. Atiya R Kazi (IT department) coordinated and conducted the course with guidance from HoD IT, Dr Vinayak Bharadi. The course was attended by 62 students of TE IT. It is expected that after attending this course, students can understand how blockchain is an integral part of many applications such as cryptocurrency, digital ledgers, and education milestones. The students were motivated to integrate ideas from blockchain technology into their future projects. They can also evaluate the security, privacy, and efficiency of any given blockchain system. All the students expressed a vivid interest in attending more such courses in future.
