A Bridge Course on Introduction To Open Source ERP Tools

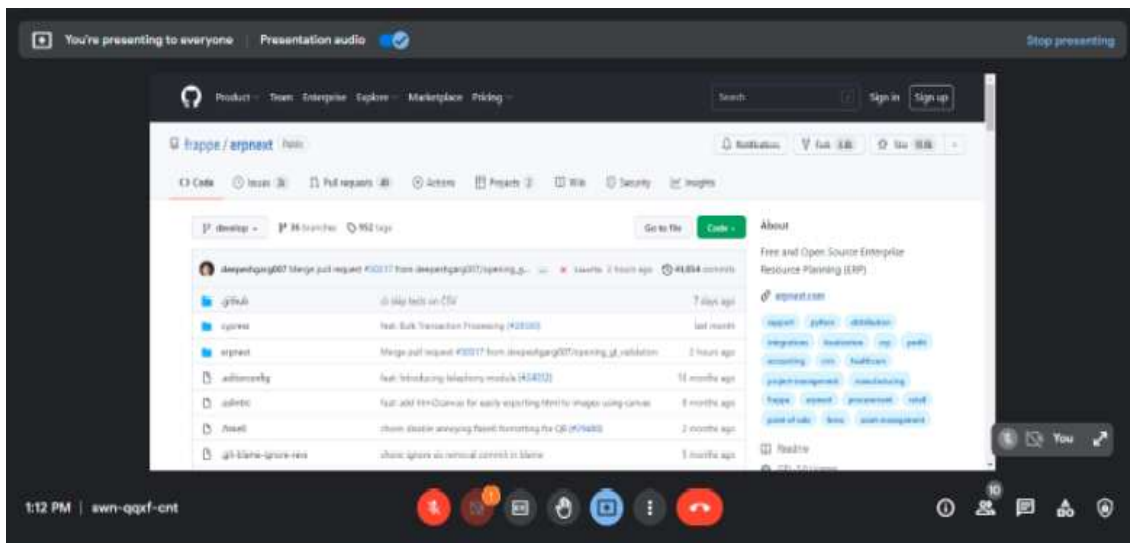

The Information Technology Department organized a bridge course on Introduction to Open Source ERP Tools from **04 to 18 March 2022** for BE IT students.

The course was conducted by Prof. Atiya Kazi with guidance from HoD IT, Dr Vinayak Bharadi. The course was conducted in online mode and attended by 44 **students** of BE IT. It is expected that after attending this bridge course:

1. students will be able to install ERP tools like odoo, ERPnext and bitrix ERP.
2. students will comprehend the advantages and limitations of implementing ERP systems.
3. students will understand the integration of various modules in open-source ERP tools like SCM and CRM.
4. students will be able to perform and track business processes like accounting and inventory management using ERP tools.

All the attendees who attended the course were satisfied by the valuable hands-on experience about new age ERP tools which are not included in their curriculum.
