Department of Computer Science Engineering**

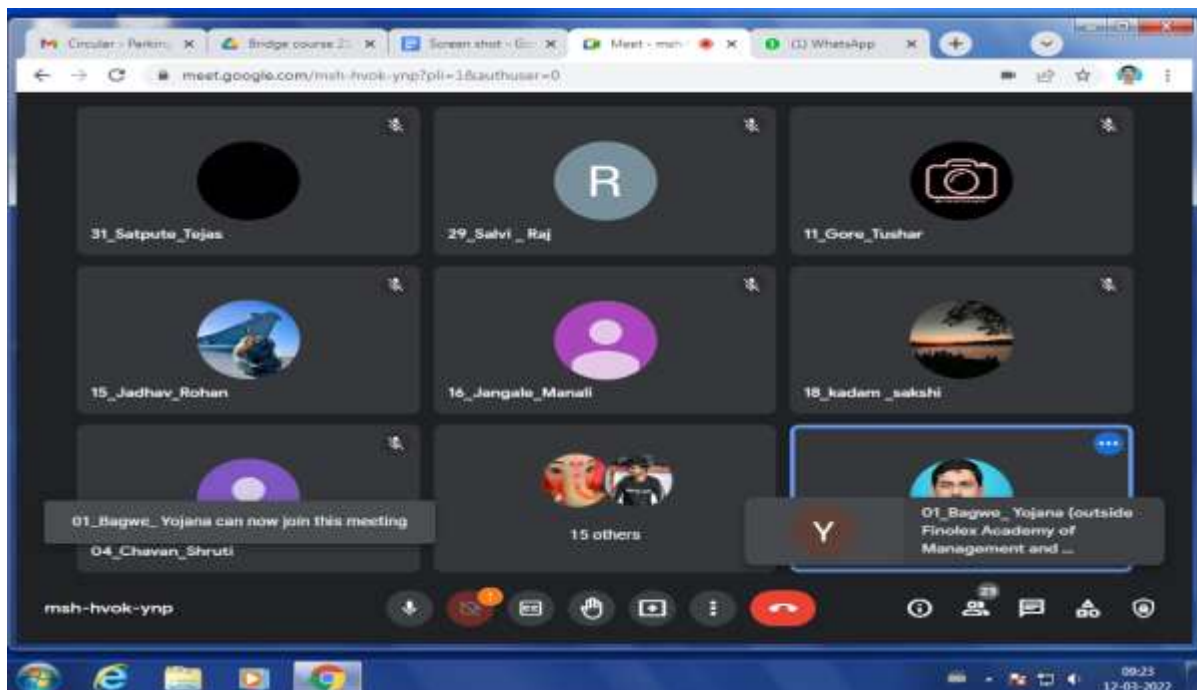

Bridge Course in Embedded Systems and Programming

Department of Computer Science Engineering organized a Bridge course on **Embedded System and Programming** on 12th March 2022 in online and offline mode. **Prof. M. A. Jadhav** was the resource person.

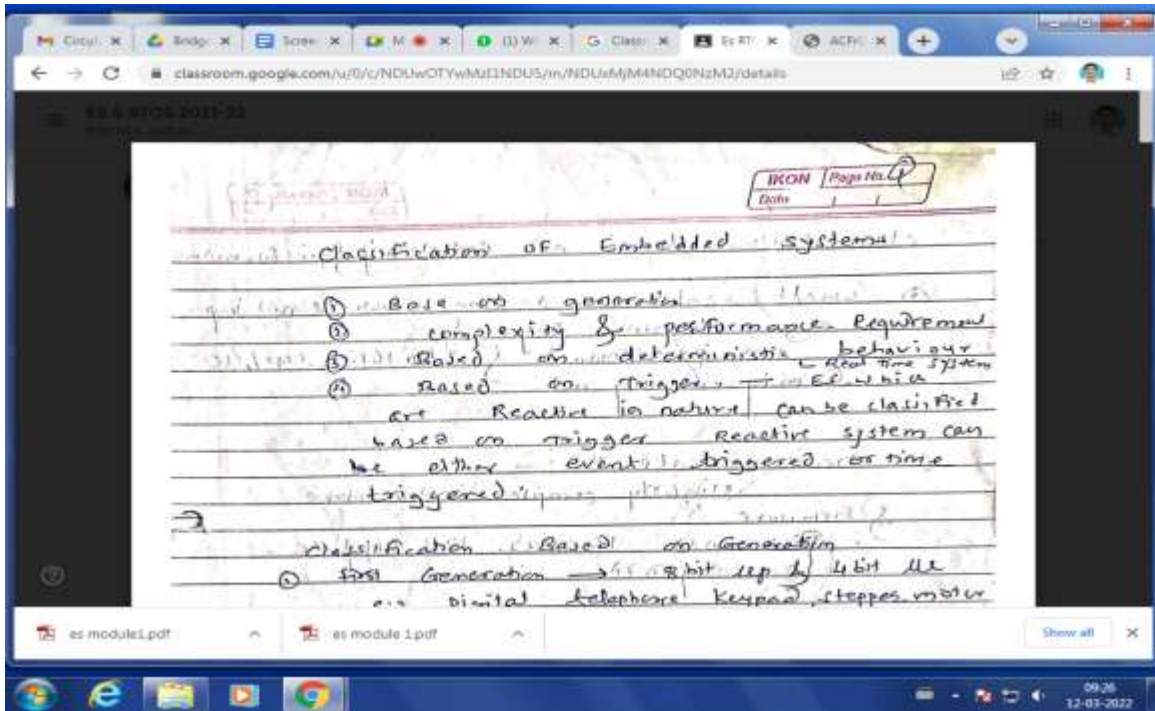

A Bridge course in Embedded System and Programming was designed to understand basic concepts of Embedded System, Classification & Design metrics of Embedded systems, and Challenges in optimization of metrics and assembly language programming for LPC 2148 16/32-bit RISC Microcontroller. The basic idea is to revive the fundamental concepts of Embedded systems and Programming.

The Bridge course was organized and coordinated by **Prof. Mahesh. A. Jadhav** with the cooperation of **Prof. Vrishali V. Nimbalkar** and all the faculty members of the department. Nearly 35 students benefited from this course.
