“ONE DAY WORKSHOP ON CYBERSECURITY”

Today's world is more interconnected than ever before. Yet, for all its advantages, increased connectivity brings increased risk of theft, fraud, and abuse. Cybercrime is a fast-growing area of crime. More and more criminals are exploiting the speed, convenience and anonymity of the Internet to commit a diverse range of criminal activities that know no borders, either physical or virtual. This timely workshop is aimed to offer awareness for the students about the cybercrimes and measures taken to counter them. We will address inherent vulnerabilities and emerging threats associated with global Internet connectivity and information and communication technology. This one day event will explore the various means that an intruder uses to gain access to computer resources. It will investigate weaknesses by discussing the theoretical background behind, and whenever possible, actually performing the attack.

Areas Covered: Fighting spams and Botnets, Network Security, Cyber crimes, Cyber security, SQL injection attack.

Speakers:

Prof. Tejas V. Joshi – HOD, MCA Department

Prof. Harshada U. Salvi – Assistant Professor, MCA Department
