IT Dept. X-Word@FAMT, 28-10-2014

DOWN

- 1. Notation Σ is used to do it
- 2. Name behind all spectral representations
- 3. This LP filter leads to blob-like effect
- 4. An image receptor in eyes
- 6. A transform used in image processing
- 8. A software that codes and decodes
- 9. A person who use Image Processing for life saving
- 10. One of the transform
- 12. A scaler type (declaration keyword)
- 13. To introduce a new idea to do something
- 15. An open source math computing software
- 17.gram indicates symbols' frequency
- 18. Name of a famous test image
- 19. This encoding eliminates interpixel redundancy

ACROSS

- 3. Recursive filter's impulse response
- 5. Kind of signal which is neither energy nor power

1

- 7. Value represented by first Fourier coefficient
- 9. This way of DFT computation is more time-complex
- 11. For whom image is imagination
- 14. Mathematically expressable signal
- 16. A kind of Image Processing dealts with shape
- 20. Commonly used programming language's function to calculate tan inverse
- 21. Image Widening using structuring element
- 22. One of the computing device keys
- 23. One of the Greek symbols
