Finolex Industry Training Program

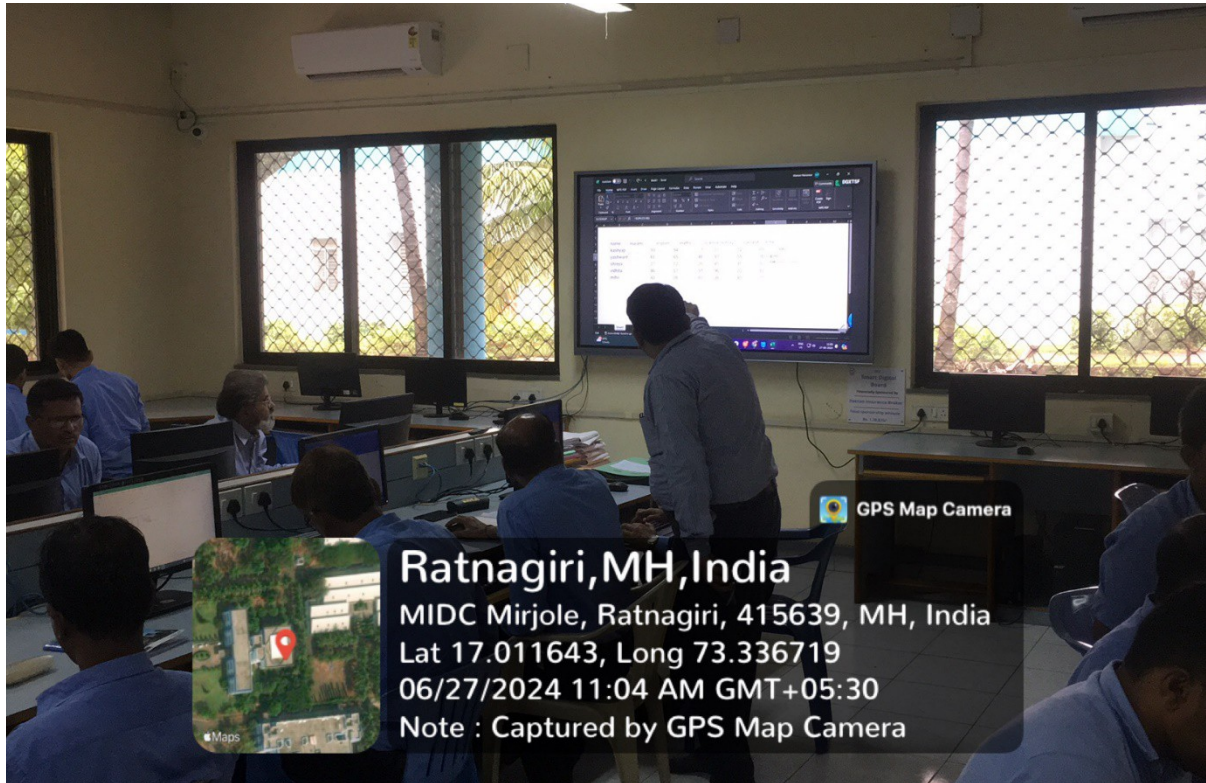

The Department of MCA, FAMT conducted a Finolex Industry Training Program on June 27th, 2024. Prof. Tejas V. Joshi welcomed the resource person and all participants. A basic computer training program for students typically covers essential skills and knowledge necessary for the effective use of computers.

This session was aimed to guide participants regarding the basic use of Microsoft Office tools like Word, Excel and PowerPoint. This training also consists of Basic text formatting, creating documents, editing, and saving Word files, creating and formatting spreadsheets, entering data, basic formulas, creating slideshows, adding multimedia elements (images, videos) and many more.

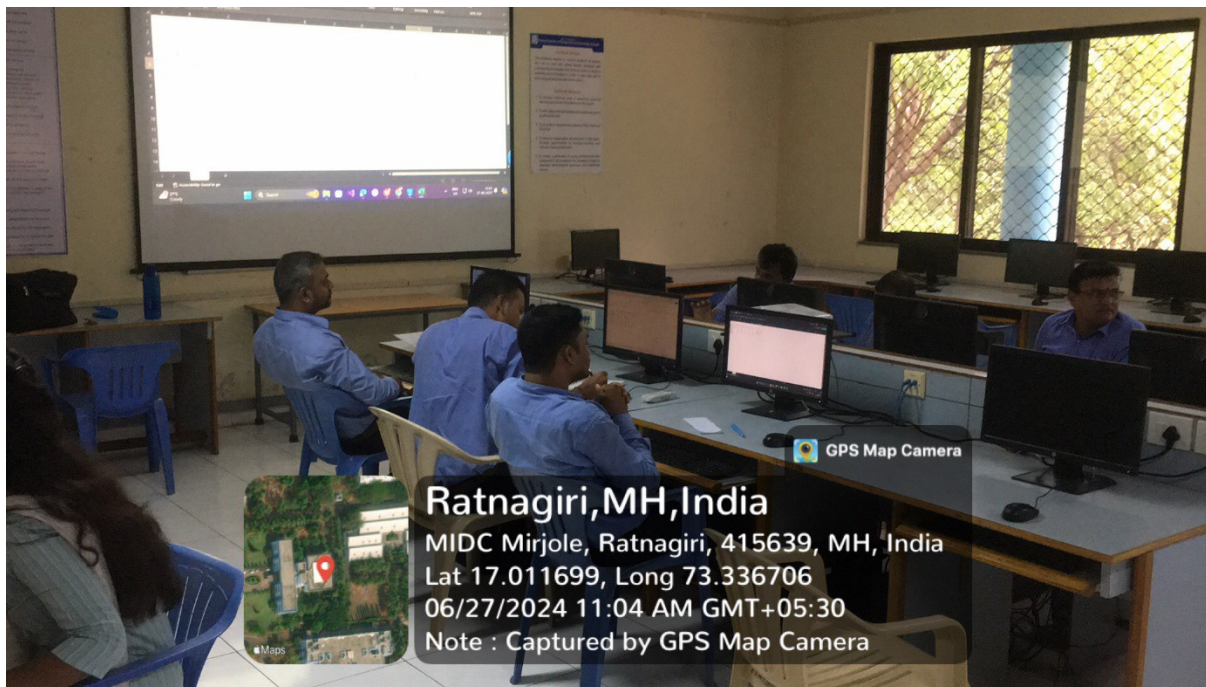

The training will be conducted through theoretical sessions and practical workshops. Interactive demonstrations, simulations, and hands-on exercises will help participants grasp concepts effectively. Case studies and real-world scenarios relevant to their industry will be used to demonstrate the practical application of computer skills.

The participants from the Finolex Industry Ltd. got fruitful knowledge about computers, and they were happy after the training.
