## SE Students' Nature and Biodiversity Camp at Amboli

The Department of Mechanical Engineering, Information Technology and Computer Science and Engineering (Cyber Security) of Finolex Academy of Management and Technology, Ratnagiri organized a Nature and Biodiversity Camp on 3rd and 4th October, 2026 at Amboli for the second-year engineering students.

This camp was organized to understand the importance of environmental conservation, biodiversity, wildlife habitats, sustainable use of natural resources, and the protection of ecosystems. Amboli, located in the Sindhudurg district of Maharashtra, is known for its green forests, beautiful waterfalls, rich biodiversity, and scenic landscapes. The region is part of the Western Ghats, which is recognised for its ecological importance and diverse plant and animal life.

The objectives of this camp were to build awareness about the importance of biodiversity and the conservation of natural ecosystems, observe different species of plants, insects, reptiles, amphibians, birds, and aquatic animals, learn about eco-friendly products and the sustainable use of natural resources, develop awareness about wildlife conservation and the protection of natural habitats and encourage responsible behaviour towards nature and promote sustainable tourism.

This camp was highly beneficial for students to understand how environmental conservation is connected to the Sustainable Development Goals.
